PUC 2-1

Request:

Please identify any additional projects or initiatives that have provided load relief in the Tiverton/Little Compton pilot area from 2012 to the present, regardless of the project sponsor, that National Grid is aware of. Please include in your answer a description and location of the project, funding source or sources, energy savings, date of operation, project sponsor, and project owner.

Response:

Project	Description	Location	Funding Source	Energy Savings	Date of Operation	Project Sponsor	Project Owner
DemandLink Pilot	NWA Pilot to reduce 1MW through incremental EE and DR	Feeders 33F3 and 33F4	SRP	25,874 Lifetime MWh	2012-2017	National Grid	National Grid
SRP Solar DG Project	Residential solarize and grid-scale solar demonstration project	Tiverton and Little Compton	RGGI, OER	Final evaluation not yet completed	2015-2016	OER	OER

Customers who were enrolled in the DemandLink demand response initiative in 2016 and 2017 were simultaneously enrolled in ConnectedSolutions, the Company's statewide demand response program. Therefore, there are no incremental savings associated with that program.

National Grid's statewide energy efficiency programs have provided load relief in the Tiverton/Little Compton pilot area during this timeframe. However, the load forecast already takes into account the impact of statewide energy efficiency programs. Therefore, the only incremental load relief attributable to energy efficiency is included in the DemandLink Pilot line item in the chart above.
